- Test libraries/frameworks: JEST, React testing library and Cypress.
- Task runners: Gulp4
- CI/CD: Working knowledge of Jenkins
- Cloud Fundamentals: Google Cloud Platform (GCP), CMS: Strapi

Key Engagements

- Created an application that streamlines credit applications for vehicle financing of Europe's top automobile client's E-commerce platform. Responsibilities encompassed backlog management, process definition, development, QA, and delivery management.
- Devised and constructed a digital platform to simplify landlord-tenant management functions for the leading Commercial Real Estate organization in the USA. Duties included requirements gathering, problem identification, technical specification development, and implementation. Additionally, devised an internal tool that reduced website time-to-market from 6 weeks to 1.
- Built a secure online platform for an Indian Pharma client. Responsibilities included analyzing requirements, prioritizing tasks, development, quality assurance, product demonstrations, and deployment.
